

# Labor for Gambling Reform

It's time for our governments to stand up to the powerful gambling corporations who use targeted predatory practices to make record corporate profits.

This isn't about stopping people gambling — it's about protecting our community from the exploitative tactics that cause widespread gambling harm.

## We are calling for the Albanese Federal Government to:

- 1 Ban online gambling inducements**  
Prohibit all online and direct gambling inducements and inducement advertising.
- 2 Remove all gambling advertising**  
Legislate a comprehensive ban on all gambling advertising across broadcast and online media, phased in over 3 years.
- 3 Implement the full recommendations from the *You win some, you lose more* report**  
Including measures to reduce gambling harm nationwide.

## We are calling for the Minns State Government to:

### **1 Stop new poker machine licences**

Introduce a moratorium on granting new poker machine licences in pubs and clubs.

### **2 Remove machines when venues close or relocate**

Cancel those licences permanently and ensure the machines are taken out of circulation.

### **3 Cut the total number of machines over five years**

Reduce NSW's poker machine count by at least 25,000, bringing us in line with Queensland.

### **4 Ban betting advertising in sporting venues**

Prohibit gambling advertising within stadiums, arenas, and sporting complexes.

### **5 Redirect the \$1 billion poker-machine tax subsidy**

End the subsidy and use the funds to support the transition away from harmful machines - with only minimal compensation given the long-term profits already made.

## How can you get involved?

- ◆ Sign up to the Labor for Gambling Reform campaign on our website: [www.labor4gamblingreform.au](http://www.labor4gamblingreform.au)
- ◆ Download our template branch motion and pass it at your local branch
